| I am logged on as administrator, but the same thing is happening on the other
| accounts as well. AVG continues to report viruses with random names like
| crxx.exe and d3uq32.exe in the WINDOWS and SYSTEM32 folders. They continue to
| show up even after I delete them. I am able to navigate thru the file system
| thru IE, but those desktop items won't open. I have never seen this before.

| Thankx,

| Rip
