| Thanks for your help!

|

| Ok, I printed your instructions and followed them step-by-step.

| Everything extracted and downloaded successfully.

|

| But when I ran Clean.bat in Safe Mode, the report generated is simply:

|

| "Virus Scan Report File

| Virus Scan Information

|

| McAfee VirusScan for Win32 v4.40.0

| Copyright (c) 1992-2004 Networks Associates Technology Inc. All rights

| reserved.

| (408) 988-3832 LICENSED COPY - Sep 23 2004

| "

|

| That's all.

The program just stopped running ? Hmmm, I wonder if it knew the name of the executable and shut it down ?

I re-programmed the script to thwart shutting down the scanner and updated the web site with a new version of the CLEAN.EXE self extracting ZIP file.

Go back and download CLEAN.EXE again from the URL --

<http://www.ik-cs.com/programs/virttools/clean.exe>

Execute; CLEAN.EXE

Choose; Unzip

Choose; Close

The file...

C:\mcafee\clean.kix should now have the date of 6/2/2005 @ 6:50 PM

{ If it doesn't, clear the Browser cache and then download and execute CLEAN.EXE again }

microsoft.public.security.virus: Re: Need help removing Backdoor.ProRat virus

Then... execute; c:\mcafee\CLEAN.BAT
{ or Double-click on 'Clean Link' in c:\mcafee }

If it runs OK, then reboot and run it in Safe Mode.
