Hi.

On MS Windows XP, this morning was able to start MS Outlook, because I get this error message which closes the app:

Microsoft Visual C++ Runtime Library. Runtime
Error!Program:C:\Progra~1\Micros~2\Office\Outlook.Exe. This application
has requested the Runtime to terminate in an unusual way.

In addition, I'm not able to access antivirus websites (symantec.com, mcafee.com, ...).

Any similar experience?

Thank you very much.
