| BTW – in case you need this info: My PC is a Dell Dimension 3000 with a
| Dell OEM version of Windows XP SP2 Home Edition. I already solved my problem
| by reformatting, but I would like to know if there's a fix for this problem
| in case I need to use Multi-AV.exe in the future. Thanks.

There is nothing in te Multi AV Scanning Tool that would cause the OS that would delete the
"turn off computer" link on the welcome screen.

Since it is open sourced coding, this is EASILY verified to be a true statement.

I'm sorry that you have this problem but I can only attribute it to the malware.
