Hi all:

Now I cannot open my external hard disc from My Computer – once I click my external hard disc (H drive), it is said "cannot find script file "H:\Bha.dll.vbs""! I believe that "Bha.dll.vbs" is a virus! Could you please tell how can I deal with it?

Thank you so much!

Fei

See the answer you already got in the other newsgroup where you posted.

Please don't multipost:

Short answer – you have a worm. Longer answer – see my reply to your other post.
