Hi all:

Now I cannot open my external hard disc from My Computer – once I click my external hard disc (H drive), it is said "cannot find script file "H:\Bha.dll.vbs""! I believe that "Bha.dll.vbs" is a virus! Could you please tell how can I deal with it?

Thank you so much!

Fei

Hi Malke:

Thank you very much! Sorry for my multipost – since I have no idea which group to post and there are a number of groups for Virus in Google!

Sorry about that!

Fei

See the answer you already got in the other newsgroup where you posted.

Please don't multipost:http://www.blakjak.demon.co.uk/mul_crss.htm

Re: What does "cannot find script file "H:\Bha.dll.vbs"" mean?

Re: What does "cannot find script file "H:\Bha.dll.vbs"" mean?

Short answer – you have a worm. Longer answer – see my reply to your other post.

Malke
