Tip:

When the header says

X-Newsreader: Microsoft CDO for Windows 2000

it is posted from the Web interface that Microsoft provides (on a Microsoft server) to the newsgroups, and where you can type in whatever mail address you like, so IP numbers/GMT times and email address will not have any correlation. You can in a way say that Microsoft provides an anonymizer service ;-)

Here is the URL to the Web interface for this newsgroup:
