I am setting up a current messenger account on a computer that didn't have messenger on it. I downloaded the program. went through the process. tried signing in it told wrong password repeatedly. Even though I just created it. So I went through the email process of changing the password. Then it gave me the same warning and sent me to the passport website which told me that I had tried to sign in too many times. My question is How long am I locked out for. I started this yesterday and still today I am locked out.
