How do I configure/setup the other CAs?

That is a really open ended question. Can you be more specific?

I have an Enterprise CA that is on a windows 2003 standard server. I would like to take advantage of the automatic user enrollment which is available in windows2003 enterprise. Can I install CA services on a Windows 2003 enterprise server that i have and have the benefits of v2 certificate templates even though the first CA is on windows 2000 standard? If so how can this be done? If not how can i get my users to

Yes, although autoenrollment will only work with the CA on the Enterprise CA.

Re: Multiple CAs& user auto enrollment

It all began with Adam. He was the first man to tell a joke—or a lie. How lucky Adam was. He knew when he said a good thing, nobody had said it before. Adam was not alone in the Garden of Eden, however, and does not deserve all the credit; much is due to Eve, the first woman, and Satan, the first consultant." – Mark Twain
