I clicked Yes, but it will say then "Windows cannot start the Windows Firewall/Internet Connection Sharing (ICS) Service."

Open Computer Management. Expand to Services and Applications > Services. Right-click "Windows Firewall/Internet Connection Sharing (ICS)", click Start. The service will likely fail to start.

Still in Computer Management, expand Event Viewer > Application. Check the Application log for errors that state the service failed to start. Also, check the System log.

Please let us know the details of these error events.

J Wolfgang Goerlich

Hello, thank you for the reply, after clicking start Windows Firewall/Internet Connection Sharing (ICS), it says " Could not start the Windows Firewall/Internet Connection Sharing(ICS) service on Local Computer. Error 10047: An address incompatible with the requested protocol was used."

Then the on the application log it says:

Description:

Performance counters for the WmiApRpl (WmiApRpl) service were loaded successfully. The Record Data contains the new index values assigned to this service.

For more information, see Help and Support Center at <http://go.microsoft.com/fwlink/events.asp>.

Re: Trying to turn ON the windows Firewall

and then another one:

Description:

Performance counters for the WmiApRpl (WmiApRpl) service were removed successfully. The Record Data contains the new values of the system Last Counter and Last Help registry entries.

For more information, see Help and Support Center at

<http://go.microsoft.com/fwlink/events.asp>.

On the system log:

Description:

The Windows Firewall/Internet Connection Sharing (ICS) service was successfully sent a start control.

For more information, see Help and Support Center at

<http://go.microsoft.com/fwlink/events.asp>.

another one:

Description:

The Windows Firewall/Internet Connection Sharing (ICS) service entered the stopped state.

For more information, see Help and Support Center at

<http://go.microsoft.com/fwlink/events.asp>.

then another one:

Description:

The Windows Firewall/Internet Connection Sharing (ICS) service terminated with the following error:

An address incompatible with the requested protocol was used.

For more information, see Help and Support Center at

<http://go.microsoft.com/fwlink/events.asp>.

Thanks,

Darlene
