Please see:

Troubleshooting profile unload issues  
<http://support.microsoft.com/kb/837115>

## RESOLUTION

To resolve this issue, use the Microsoft User Profile Hive Cleanup Service (UPHClean). UPHClean monitors the computer while Windows is unloading user profiles and forces resources that are open to close. Therefore, the computer can unload and reconcile user profiles.

To download and install UPHClean, visit the following Microsoft Web site:

<http://www.microsoft.com/downloads/details.aspx?FamilyId=1B286E6D-8912-4E18-B570-42470E2F3582>

I keep on getting this Warning in the Event Viewer under Application every time I turn of my computer.

So can someone help me figure out how I stop it from doing that?

Event Type: Warning

Event Source: Userenv

Event Category: None

Event ID: 1517

Date: 10/8/2007

Time: 7:09:45 PM

User: NT AUTHORITY\SYSTEM

Computer: SK-7654291A1166

Description:

Windows saved user SK-7654291A1166\sk registry while an application or

## Re: Warning Userenv

service was still using the registry during log off. The memory used by the user's registry has not been freed. The registry will be unloaded when it is no longer in use.

This is often caused by services running as a user account, try configuring the services to run in either the LocalService or NetworkService account.

For more information, see Help and Support Center at <http://go.microsoft.com/fwlink/events.asp>.

Event Type: Warning

Event Source: Userenv

Event Category: None

Event ID: 1524

Date: 10/8/2007

Time: 7:09:44 PM

User: SK-7654291A1166\sk

Computer: SK-7654291A1166

Description:

Windows cannot unload your classes registry file – it is still in use by other applications or services. The file will be unloaded when it is no longer in use.

For more information, see Help and Support Center at <http://go.microsoft.com/fwlink/events.asp>.
