RAS and IAS Server.

I've created a duplicate and both the original and duplicate are seen in the CA's Certificate Template folder. I'm sure I'm just missing something really simple, but can't see that template in the certsrv web page.

I'm trying to add a new certificate template. I've deployed it as per <http://technet.microsoft.com/en-us/library/cc783016.aspx>, but when I go to the certsrv web site (<http://dc1/certsrv>), I can't see the template there. I know I'm probably just missing a simple step - but all suggestions gratefully received.

What template did you duplicate?

The Web brings people together because no matter what kind of a twisted sexual mutant you happen to be, you've got millions of pals out there.

Type

in 'Find people that have sex with goats that are on fire' and the computer

will ask, 'Specify type of goat.'
