Glad to hear that Q224587 appears unnecessary <g>, and <http://support.microsoft.com/support/kb/articles/q300/4/20.asp> is a possibility.

Still guessing, but check out

<http://support.microsoft.com/support/kb/articles/q291/3/66.asp>.

A more methodical approach to orphaned users t-shooting is doc'ed in <http://support.microsoft.com/support/kb/articles/q274/1/88.asp>. Please pardon me for omitting it within my last reply.

Thanks,

Bill Hollinshead
