this is the latest version of security update, the "September 2003, Cumulative Patch" update which eliminates all known security vulnerabilities affecting MS Internet Explorer, MS Outlook and MS Outlook Express as well as three newly discovered vulnerabilities. Install now to help protect your computer from these vulnerabilities, the most serious of which could allow an attacker to run executable on your system. This update includes the functionality of all previously released patches.

System requirements Windows 95/98/Me/2000/NT/XP

This update applies to MS Internet Explorer, version 4.01 and later

MS Outlook, version 8.00 and later

MS Outlook Express, version 4.01 and later

Recommendation Customers should install the patch at the earliest opportunity.

How to install Run attached file. Choose Yes on displayed dialog box.

How to use You don't need to do anything after installing this item.

Microsoft Product Support Services and Knowledge Base articles can be found on the Microsoft Technical Support web site. For security-related information about Microsoft products, please visit the Microsoft Security Advisor web site, or Contact Us.
