I want to backup a database to a CD Burner on the same machine, but I cannot get the "Select Backup Destination" dialog to recognise anything that is not a harddisk.

Can anybody help please.

I realise this is probably a bit basic for this site but what the heck, if you need help go to the top. A pointer to a web page that describes the process would be enough if a full answer is to much hassle.

I am using Windows XP, SQLServer 2000

Thanks
