Hi Dan,

> (*Integrated Security=SSPI* instead of *userid and password*).

Great! I stubled across that while Googling. I appended it but left uid/pswd in. Now I've removed the latter. That got me further with a new symptom.

=====

Login failed for user 'ASCI2G-WS2\ASPNET'.

Description: An unhandled exception occurred during the execution of the current web request. Please review the stack trace for more information about the error and where it originated in the code.

Exception Details: System.Data.SqlClient.SqlException: Login failed for user 'ASCI2G-WS2\ASPNET'.

Source Error:

```
Line 73: "server=ASCI2G-WS2;database=mycomics;Integrated
Security=SSPI");
Line 74: DataSet ds = new DataSet ();
Line 75: adapter.Fill (ds);
Line 76: MyDataGrid.DataSource = ds;
Line 77: MyDataGrid.DataBind ();
```

Source File: f:\inetpub\wwwroot\DataGrid-Prosise.Comics.aspx Line: 75

=====

So I tried two things:

1. Added ASPNET as a login with no server roles but database access to MyComics in roles public & db_datareader/writer.
2. In addition, I set security to *both* NT and SQLServer, but I just went

microsoft.public.sqlserver.security: Re: DB connection problem in attempt to load DataGrid from SQLServer DB

back to Ent. Mgr and can't figure out where I made that change. BTW, I'm running SQLServer 7.0/SP2 over WinXP-Pro/SP2 with WindowsUpdate stuff.

If you have the time to tell me the path in Ent. Mgr to change the security mode, I'd be very appreciative.

> *Be sure not to use the 'sa' login for routine application access.*
OK, thanks.

> *Hope this helps.*
It ABSOLUTELY helped!

Regards,
Richard
