Yes, we did. We know one of their IPs and blocked it...
But they are using now another IP (IPnumber 9 and 3 different domains also!!...:-<)
It takes a lot of work every time blocking another IP of theirs....
So the easy thing for us is to just simply(??) change the sa loginname into something else.
But I guess that's not possible??
We cant change our Domain name or SQL server name also...!!
Why cant I change the sa loginname???

thanks for the help Joseph
