Hi,

SQL 2005.

I would like to encrypt the SSN column (the PK).

Currently, I have an application that searches according to SSN (i.e. – the user types her SSN for verification, and then her details are retrieved from the SQL Server table).

So, the column that is encrypted is the only column that I can use to search according to, plus it should be the PK.

Is it possible to do it with the SQL 2005 encryption?

How do I solve the performance issue of searching (select *...) on an

Re: SQL 2005 – Searching Encrypted SSN

encrypted column?

Many thanks,

Ron
