You would need to use some type of third party encryption.

Check the links under field level encryption in the following FAQ:

<http://www.sqlsecurity.com/FAQs/SQLServerFAQ/tabid/55/Default.aspx>

What is the recommended way to store data in SQL Server 2000 encrypted so not even DBA can see the values? I know SQL 2005 has encryption at the row level, but what are my options in SQL 2000?

Thank you,

Steve
