Carlos

Does the job have a status "Enabled" --YES

Any errors in Event Viewer ? SQL Server ERROR.LOG file?

hi again,  
sorry, SQL server agent does'nt report errors....

Hi,  
I have Sql server 2000 Enterprise Ed run over Windows 2000 Advance Server  
with sp4, some times, jobs not run, but sql server agent is running. SQL Server Agent report errors, is very stranger, because SQL Server Agent is like "frozen".

Some any ideas?

Thanks a lot for you help.
