Hi Dana,

My understanding of your issue is that:

You found that DBCC dllname(FREE) could not be executed with db_owner. You could run it with sysadmin.

If I have misunderstood, please let me know.

I looked through our internal database and found that this was a documentation issue (223167) of BOL.

BOL should read:

DBCC dllname (FREE) permissions default to members of the sysadmin fixed server role, and are not transferable.

Please assign the login account with sysadmin permission to run the statement.

If you have any other questions or concerns, please feel free to let me know. It is my pleasure to be of assistance.
