HI Steven,

Comments inline. BTW, this is my home machine – just one server and one workstation. I am always logged in administrator.

Thanks,

Peter

Nothing indicative of any problem at all.

> *might want to try to reset your local security policy.*

How?

> *would also suggest running dcdiag first on the domain controller to see what it reports while logged on as a domain administrator. It is located on cdrom in support/tools folder where you will need to run the setup program there. -- Steve*

No problems reported.,

Peter
