Hi,

Windows .NET Server is Windows Server 2003's beta name. Did you upgrade to the final yet? On the final you can just go to

<http://windowsupdate.microsoft.com> to get the latest updates. A trial of the final product is here:

<http://www.microsoft.com/windowsserver2003/evaluation/trial/evalkit.msp>

NOTE: On the beta, you can't install any patches.

I don't know the answer to your second question, but I'm sure someone does
