

Outlook security

When I am trying to send an e-mail using another program the following message occurs:

"A program is trying to access e-mail addresses you have stored in Outlook, If this is unexpected, it may be a virus and you should choose NO..."

After I click YES:

"A program is trying to automatically send e-mail on your behalf. Do you want to allow this?...."

This is probably Outlook security option, but I can not find how to get rid of it.

Can anybody help?

Thanks!
