The most likely cause for this is clients not meeting the pre-requisites for this patch:

Microsoft Data Access Components (all versions)
Prerequisites

This security update requires that you have any one of the following MDAC versions installed:

MDAC 2.5 Service Pack 2
MDAC 2.5 Service Pack 3
MDAC 2.6 Service Pack 2
MDAC 2.7
MDAC 2.7 Service Pack 1
MDAC 2.7 Service Pack 1 Refresh
MDAC 2.8

The recommendation is to install MDAC 2.8 and then MS04-003 so that you have the latest version of MDAC. If this is not feasible, you can check your current version of MDAC using the following article and at least update that version to a supported service pack.

301202 HOW TO: Check for MDAC Version
