You have a virus. Get e.g. AVG7 from [www.grisoft.com](http://www.grisoft.com) and clean your system. Then get a firewall, block everything and see what doesn't work. I prefer the free Kerio 2.1.5 firewall. I would also suggest going into Component Services and disabling those services you don't need. Here's my changes (yours may differ):

Original configuration:

-----  
\_M == Manual, unstarted  
SM == Manual, started  
SA == Automatic, started

New configuration:

\_ == Unchanged  
D == Disabled

01 \_M \_ Alerter  
02 \_M \_ Application Management  
03 SA D Automatic Updates  
04 SA \_ AVG7 Alert Manager Server  
05 SA \_ AVG7 Update Server  
06 \_M \_ Background Intelligent Transfer Service  
07 \_M \_ ClipBook  
08 SM \_ COM+ Event System

- 09 SA \_ Computer Browser
- 10 SA D DHCP Client
- 11 SA \_ Distributed Link Tracking Client
- 12 \_M \_ Distributed Transaction Coordinator
- 13 SA \_ DNS Client
- 14 SA \_ Event Log
- 15 \_M D Fax Service
- 16 \_M D Indexing Service
- 17 \_M D Internet Connection Sharing
- 18 SA \_ IPSEC Policy Agent
- 19 SA \_ Kerio Personal Firewall
- 20 SA \_ Logical Disk Manager
- 21 \_M \_ Logical Disk Manager Administrative Service
- 22 SA D Messenger
- 23 \_M D Net Logon
- 24 \_M D NetMeeting Remote Desktop Sharing
- 25 SM \_ Network Connections
- 26 \_M \_ Network DDE
- 27 \_M \_ Network DDE DSDM
- 28 \_M \_ NT LM Security Support Provider
- 29 \_M \_ Performance Logs and Alerts
- 30 SA \_ Plug and Play
- 31 SA D Print Spooler
- 32 SA \_ Protected Storage
- 33 \_M D QoS RSVP
- 34 \_M \_ Remote Access Auto Connection Managaer
- 35 SM \_ Remote Access Connection Manager
- 36 SA \_ Remote Procedure Call (RPC)
- 37 \_M \_ Remote Procedure Call (RPC) Locator
- 38 SA D Remote Registry Service
