Hello,

*>Should I go for it or does Windows offer some kind of  
>security software update?  
>I've just installed DSL to my computer and all these  
>happened.*

You need to create a wall between you and the internet. There are a number of different firewall applications that you can use, there is also an article that details what is happening that you might find helpful at <http://www.security-software.info/firewall-software.htm>

Best

Jarrod
