| We have found on one of my servers NT 4.0 and some users  
| several of these messages appearing in Windows Messenger  
| Service

|

| "Message from RMAFFEO to <Domain\_name> on 9/17/04  
| 4:36PM hi sexy"

| "Message from RMAFFEO to <Domain\_name> on 9/17/04  
| 4:36PM Hello sexy"

|

| After clicking "ok" the message disappears.

| Can someone tell us where this message came from? We have  
| a fire wall and up to date will all DAT files and Windows  
| updates. Is it a hacker or some employee who knows few  
| tricks?

|

Take a look through your user's folders and see if any of them have  
winpopup.exe – that's what the students here used to use to send  
annoying messages round the network. Users 'could' be using the command  
line, but my guess is that they aren't.... Of course they could be  
bringing it in on a floppy and running it from there.
