Sounds good. As far as Hijack This logs you probably would be better off also posting in a forum or newsgroup specific for such. If you Google for "hijack this logs" or such you should find plenty. I would be happy to take a look but others can spot problems right away as they are used to looking at them often. You also may want to check for malicious BHO's with something like BHODemon. --- Steve

<http://www.definitivesolutions.com/bhodemon.htm> ---- link to BHODemon.

<http://mvps.org/winhelp2002/unwanted.htm> ---- tips on parasites.
