Another thingh

My main goal in this case is to allow L2TP connections to my vpn server, from my remote users.

How Can I acomplish this using Standard Edition!!!
Thanks again

"Brian Komar [MVP]" <bkomar@xxxxxxxxxxxxxxxxxxxx> wrote in message <news:MPG.1e7b9b7ba39c5f9f989709@xxxxxxxxxxxxxxxxxxxxxxxx>

In article <uiw0LYHRGHA.5552@xxxxxxxxxxxxxxxxxxxx>, jms_pt@xxxxxxx says...

I forgot to Say that both Domain Controller (Windows Server 2003 Stabdard Edition) and Member Server my CA (Windows 2003 Standard Edition) both have SP1 installed.

Best regards

Glad (sad) you added this. Autoenrollment requires that the CA be running Enterprise Edition. Autoenrollment is not supported on Standard Edition CAs.
