-

i have enabled the event log for security

now i get ther error message

Category: account logon

ID: 675

Username: Administrator

Servicename: krptgt/TQG

Preauthenticationtype: 0x2

Error Code 0xE

(I have translated the Error-messages my be it differs a little from the Original-Errors)

- I have allready changed the Passwort from the Adminstrator

- I was trying to logon to Remotedesktop to a DC (W2000-SP4)
from a Workstation (W2000-SP4)

Hi,
there are many errors in the eventlog:

"Das Konto Administrator verfügt nicht über den zum Generieren eines

Re: Eventlog Errors ID 8 source KDC

Kerberos-Tickets benötigen Schlüssel. Wenn der Verschlüsselungstyp unterstützt wird, wird das Ändern oder Festlegen des Kennworts den notwendigen Schlüssel generieren. "

The Administrator needs a key to generate a Kerberos-Ticket!?

What can i do?

regards
lothar
