That information is kept in the security log once auditing of account logon and /or logon events is enabled for success and failure in Local Security Policy as explained in the first link below. There are third party programs that can help you create reports of the information you want such as GFI Events Manager.

Steve

<http://support.microsoft.com/default.aspx?scid=KB:en-us;q248260> --- for domain controllers you need to enable auditing in Domain Controller Security Policy or whatever GPO linked to the domain controller container that you are using to manage domain controller policy if you have additional GPOs linked to it.

<http://kbase.gfi.com/showarticle.asp?id=KBID002879> --- GFI Events manager

<http://www.microsoft.com/technet/security/guidance/auditingandmonitoring/securitymonitoring/default.aspx> --- The Security Monitoring and Attack Detection Planning Guide

I have a requirement. In which after successful login into the system administrator will get the banner which gives Last Login Date and Time, Number of unsuccessful Login attempts since last successful login and Location of worksation of last login.

Thanks,
Alpesh
