Try posting in a more general Windows newsgroup as this one is for Windows 2000 security. Having said that be careful changing the operating system on a computer that came with Vista already installed – particularly laptops as it can be difficult to find the drivers you need for all your hardware to work correctly.

"AMD Turion x64bit 2.20GHz" <AMD Turion x64bit 2.20GHz@xxxxxxxxxxxxxxxxxxxxxxxxxxxx> wrote in message news:28C11D4E-8454-4EDE-A1D5-4F1BCFAFFD80@xxxxxxxxxxxxxxxxxxxx

Can i know what is the best Opearting System for my Processor which is x64 amd 2.20GHz with 4Gb Memory and 200GB HDD.
Currently i am using Home Premium (MS Vista) and i dont see a point using
it any further as the performance is just not upto the mark as its a 32bit windows so can i know the OS that would give me optimum power.
Thank you
