A trace of commands. From what you said in your previous post, I assume results of command would show through auditing objects.

"Roger Abell [MVP]" <[mvpNoSpam@xxxxxxx](mailto:mvpNoSpam@xxxxxxx)> wrote in message [news:OyxyOOS\\$9GHA.4708@xxxxxxxxxxxxxxxxxxxxxxxxxxxx](mailto:news:OyxyOOS$9GHA.4708@xxxxxxxxxxxxxxxxxxxxxxxxxxxx)

So you want to have a trace of the commands, or of the effects resulting from the commands ?

Are system administrator commands traceable back to an individual user ID?
