Tell us what audit settings you are using for files.
For example, audit Full Control success by Everyone.

Hi,

i am trying to using audit poliy for files and folder (in win2003 domain)..

i saw security events successufully about accessed files (who accessed, when accessed, ..) also true location and file name; for example
D:\new folder\document.doc

but i couldn't see file name when i deleted any file; i just saw that "explore.exe" as file name :(
for example
D:\new folder\explorer.exe

i want to see that deleted file names when a user delet it truly...

What can i do ?

Thanks for everythings...
