I would be surprised if there was a way to automatically add your application to the list. That would have definite security implications because malware authors could then do the same. Someone may come along and post a solution, of course (that's the great thing about these groups.)

Why not provide this information to the customer in an admin guide?

I can't do that directly.

This have to be done by my software upgrade package, that will run on the server by the customer.

I don't have a remote connection to the server.
