Scheduled Tasks don't run unless I am logged on

If I am logged off, I get this message at the logon screen: "Some tasks did not execute at their scheduled times because the Task Scheduler service was not running. You can view the list of missed tasks, and attempt to run them again, from within the Scheduled Tasks folder." The Schedule service startup type is Automatic, using the Local System account.

Any ideas?

I am running XP Home. Do XP Home and XP Professional handle Scheduled Tasks differently?
