First time I've ever been called an "expert"  
I am not.....I am just an ordinary everyday user who like to see how things work

peter

| Instead of starting completely over..if you have your xp  
| disk it can restore some missing files without formatting  
| the drive completely..the problem may be way to  
| complicated for this because with the virus clean other  
| programs not recognized by the disk can have missing  
| files. Try re-installing xp again..if it doesn't work do  
| what the expert says.
