Hi Kyle,

Thanks for your help. I am a happy man once again! It all works fine after SP1 installation. There is a problem though which occurred after I installed SP1 a month ago. Because of this I uninstalled SP1 until I could find a solution. I run Microsoft Flight Simulator 2002, and when I begin a flight the "Brakes are on" message at the bottom of the screen is slightly blurred. Also (when 'in flight') I go to access the options menu at the top of the screen using the Alt key nothing happens. It does seem that the options are there and the game is running correctly, (for it pauses as it should) but they are not shown on the screen. I think this is the case because when I use CTRL C to end the game, it does so correctly. Could you advise please? Thanks for help so far. My machine hopefully is ok again now.

Thanks for your help.

Tim.

>Based on my experience, this issue can be caused by the damaged temporary

>Internet files in your system. Please clear the temporary files including

>all offline content. To do so, you need to follow these steps:

>=====

>1. Open Internet Explorer and click Tools-> Internet Options

>2. In the Temporary Internet Files section in the General tab, Click Delete

>Files.

>3. Check the Delete all Offline content checkbox and click OK.

>4. In the History section, Click Clear History and click OK.

>5. Click the Delete Cookies button and click OK.

>6. Click the "Settings" button in the Temporary Internet Files area.

>7. Click the View Files button, and then remove all the files in the

>"Temporary Internet Files" folder. Then close the folder.

>8. Click the View Objects button, and then remove all the objects.

>9. Click OK twice to close the dialog boxes.
