Hi Mike,

You may boot into Safe Mode and log on using the account "Administrator" and then reset the password for your account. The password for this account was set when you installed Windows XP on your computer. If you are using Windows XP Home Edition, this password is blank by default.

To boot into Safe Mode, please refer to the following steps:

=====

1. Restart your computer and start pressing the F8 key on your keyboard. On a computer that is configured for booting to multiple operating systems, you can press the F8 key when you see the Boot Menu.
2. When the Windows Advanced Options menu appears, select an option, and then press ENTER.
3. When the Boot menu appears again, and the words "Safe Mode" appear in blue at the bottom, select the installation that you want to start, and then press ENTER.

For more information, please refer to the following Microsoft Knowledge Base article:

321305 How to Log On to Windows XP If You Forget Your Password or Your Password

<http://support.microsoft.com/?id=321305>

If you have any concerns, please feel free to let me know.

Regards,

Kyle Cui
