I have a list of "updates" that says "download now." I haven't downloaded any of them because I'm not sure what I need. There is about a list of 20 of them....can anyone help me and give me what is necessary using Windows XP...they all seem to be security issues, and also about the "patch for Internet Explorer 6" I'm totally confused....or does anyone have a phone number where I might get help. Thank you!!
