A. Re Q817287:

1. I unzipped Q817287 and ran the set up OK.
2. Yet Q817287 did not show up under installed programs in Control Panel.
3. History in Windows Update on-line shows it installed successfully but Q817287 Self Extracting Cabinet still appears in the WU.temp file.
4. Question: Is it installed or not?

B. Re 811493. It is still in WU temp file as self extracting cabinet. I did not touch and it does not show up in Installed Programs. Question: Can I delete the WU temp file safely?

C. Re Migration dll: 811493 seems to have messed up my Norton AV system. It is gone. I tried to re-install it from my CD but I get the following Error message:

Error 25013 Setup is unable to load the migration dll.

Question: What can I do here?

Ed
