I had the same problem and found this fix for it:

"How to stop Messenger popup Spam – FREE:

These 4 easy steps will turn off the messenger service used to send messenger service popup ads. The Messenger service is not related to Windows Messenger or MSN Messenger.:

Go to Start, then Run and type in services.msc Click Ok

Scroll to Messenger, select it, right click it and choose Properties.

Under startup choose "Disabled", then choose Stop.

When stopped, click Ok. "

Worked for me!
