I have a similar problem in that after reinstalling my system I can no longer access my entire Owner directory.

How did you redirect your "My Documents"?

"Carl Viens" <carlviens@vif.com> wrote in message news:007e01c331cb\$8570a520\$a401280a@phx.gbl...
When I first installed XP Pro (C drive), I redirected "My Documents" to a folder on a bigger hard drive (D drive) because of the 25Gigs it contained. Then to make it safe against intrusions from anyone on my home LAN, I went in the properties of the folder and selected "Make this folder confidential" (my XP is in french so the translation might not be exact). But since XP crashed for the last 3 days, I decided to format the C drive in NTFS and reinstall XP but now I can't access the folder "My Documents" on the D drive and all of its 25Gigs. I used the same CD, same key number, same user name and I still can't get it to work.

I presume it generated a code or something like that. Is there any chance I could recover my files?

Merci à vous! Thanks to you!
