I am facing serious problem while using Windows Explorer or while browsing the system otherwise.

Suddenly a pop-up comes up saying "Windows XP has encountered a problem and needs to be closed. " "any unsave info will be lost".

On clicking on details the error signature is as follows:

App Name : explorer.exe

App Version : 6.0.2800.1106

Module Name : unknown

Mod Version : 0.0.0.0

Finally i am forced to close n a suggestion comes in a pop-up saying "If u continue facing this problem Restart ur computer".

If anybody has any idea kindly suggest, thanks.
