This event is logged on all my winxp machines, and group policy is not working on some of them.

Windows cannot access the the object
OU=Employees,OU=Ava,DC=avaschools,DC=k12,DC=mo,DC=us in
Active Directory. The access to the object may be denied.
Group Policy processing aborted.

I have a windows 2000 native mode network. I have SP1 installed on all the xp machines, and have copied all the xp adm files up to the server. Any help would be greatly appreciated.
