I had a trial period for the privacy service and it recently expired. After it expired my email and other things did not work right when the computer booted up so I tried to uninstall the mcafee services. now it does nothing but constantly pop up "AN APPLICATION COMPONENT IS MISSING. PLEASE REINSTALL MCAFEE.COM PRIVACY SERVICE." I purchased the service again and reinstalled it, everything did fine except for the PRIVACY SERVICE. It shows it is protecting my computer but it doesn't prompt me to sign in and it doesnt let my email work right and constantly pops up the message I quoted above. Can anyone please help me? Thanks Jason
