Press CTRL-ALT-DEL twice, at the Welcome Screen, with no other users logged on. You'll get the old Win2K style logon. Once you're logged in, to enable the Administrator account on the new Windows XP logon screen, visit my web site, [www.dougknox.com](http://www.dougknox.com) and go to the Windows XP section. Follow the link for Enable Administrator Account .....

This small VB Script will make the registry change necessary for the Administrator account to be available on the Welcome Screen.
