You should only have one (1) firewall program installed and enabled.
More than one firewall program enable will cause conflicts with the others.

How can I harden my computer or server to secure it from hackers?

<http://securityadmin.info/faq4.asp#harden>

To secure your computer and prevent future security breeches,
consider installing a first-rate internet security program:

Norton Internet Security 2004

http://www.symantec.com/sabu/nis/nis_pe/

- Includes Norton AntiVirus 2004
- Includes Norton Personal Firewall
- Includes prevention of annoying web pop-ups
- Includes Parental Controls
- All in one, easy-to-install package

news:AtmdnUeRNNapjWaiRVn-jw@comcast.com...

| If this is not a right forum, I apologize in advance. This is a brand new
| laptop from Dell running WindowsXP Service pack 1 and Java from SUN. I
| think I am getting fake SynFlood attacks? I am running SMC firewall, Norton
| AV, and ZoneAlarm. This only occurs when connection is slow and it appears
| to load various images from the website. Sometime it works fine. I can
| probably duplicate this 7 out of 10 tries. This website invokes JSP
| file(JavaScript). Is there something strange about JavaScript. My other
| Windows98SE PCs on my LAN don't experience same problem. Thanks.

| I get the following logs in my SMC firewall:

| Time: 01/05/2004, 19:47:09

| Message: SYN Flood to Host

| Source: 192.168.XXX.XXX, 1297

| Destination:YYY.YYY.YYY.YYY, 80 (from WAN Outbound)

Re: Syn Flood attacks?

microsoft.public.windowsxp.security_admin: Re: Syn Flood attacks?

|
| 192.168.XXX.XXX - PC on my LAN with NATed address.
| YYY.YYY.YYY.YYY - is website for well known camera/printer/copier company.
