| Date: Fri, 16 Jan 2004 18:54:05 -0800

| Hello,

| Is there anyone who can help me delete the other users  
| that have signed into my .Net passport login window off of  
| windows XP? I found an article closely related to that  
| regarding windows 2000 but it wasn't able to be completed  
| with XP. Thanks

| mat

Dear Mat,

I just tested this with the .NET Passport Sign-in screen. Upon visiting the page at <http://login.passport.net>, my user name had been cached and was already in the email Address box (what you don't want).

I proceeded to sign in, but first I checked the box which says: [ ] "Do not remember my email address for future sign-in".

After signing in, I signed out. then went to sign in again. Result: my email address was not cached. Instead of my email address, the box reads: <Type your e-mail address>.

I hope this helps.

Note: it works differently than Windows Messenger.
